TECHNICAL NOTE

U.S. DEPARTMENT OF THE INTERIOR – BUREAU OF LAND MANAGEMENT

GATE CLOSING DEVICES

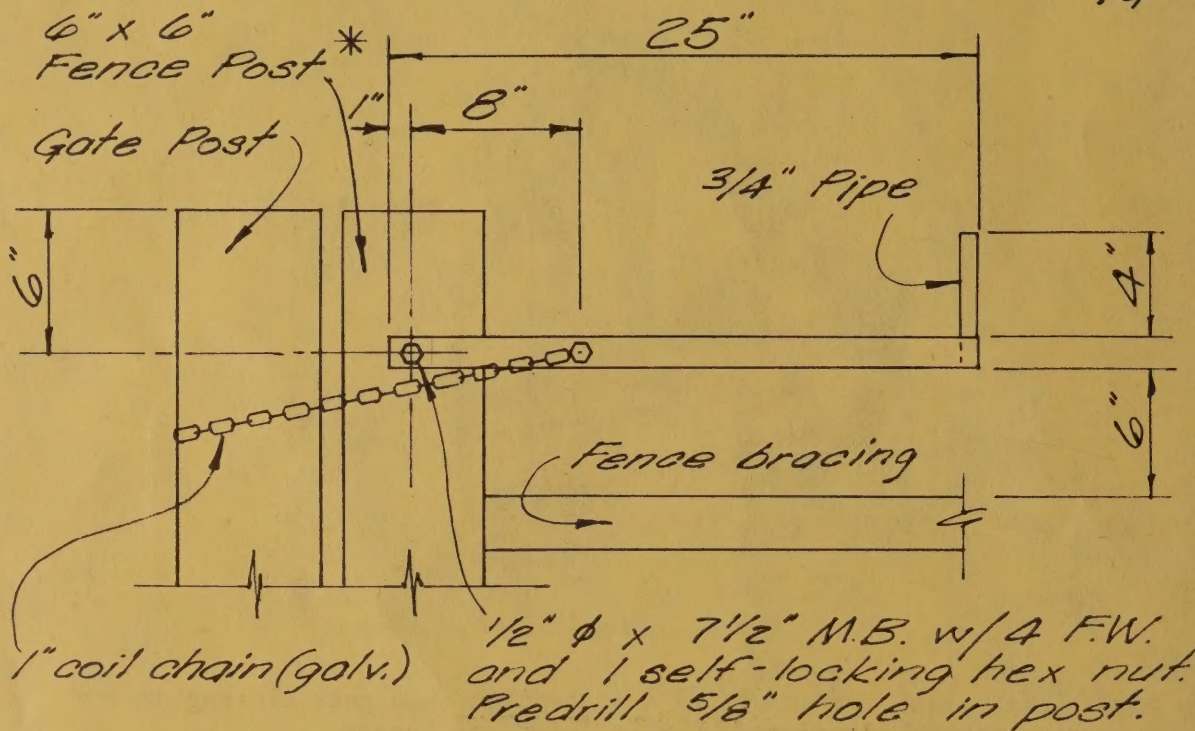

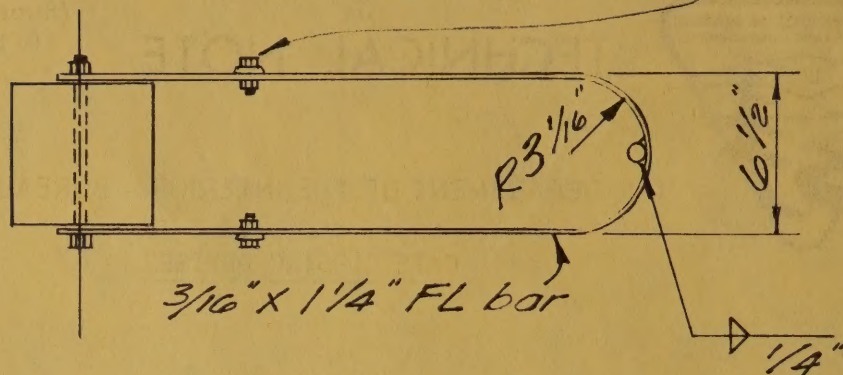

Two Bureau employees have submitted a suggestion on a gate closing device to be used whenever appropriate on wire livestock fences.

There are many commercial varieties available. One type is shown on BLM Standard Drawing No. 08-33-9105.41-1c. Also, pictured above is a type designed and used in the Susanville District, Susanville, California.

The type selected or desired by a district can be specified by functional characteristics on the Specification Supplement 9172-28 for fences. If necessary, special drawings can be added to clarify the type desired, or it can be furnished by the Bureau and so indicated in the Specification Supplement 9172-28.
